

Building the UK's smart data for good ecosystem

Data

Partnerships

Financial leaders securely & regularly donate anonymised data to FINDS.

Up to 200k SMEs, covering payroll, invoices, VAT & cash flow.

5m GB customers, detailed income & expenditure categories.

Data Ingestion

Data is ingested into a secure Trusted Research Environment (TRE), providing the infrastructure for large - scale analysis.

The TRE is LLM coding co-pilot enabled, and provides GPU and HPC for resource intensive AI and ML processing.

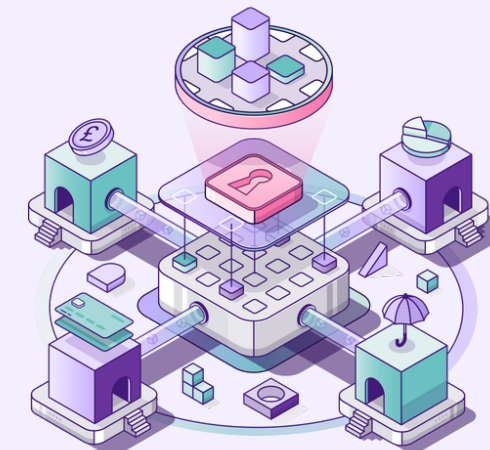

Five Safes Model promotes ethical data access and stringent access protocols to protect privacy.

Data Outputs

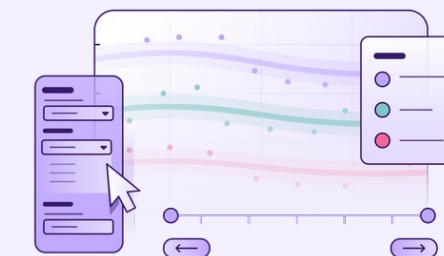

Data is transformed into research data sets and dynamic indicators for the Economic Wellbeing Explorer and Economic Nowcast.

Curated data sets support academic and policy research.

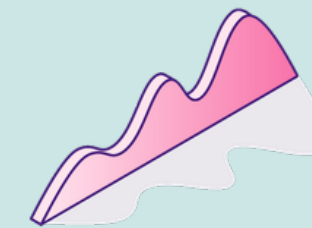

Explore aggregated data, updated monthly, to identify trends and drive insight and hypothesis.

Data

Impact

Data is used for research and analysis by policy makers, local & national governments and academic researchers.

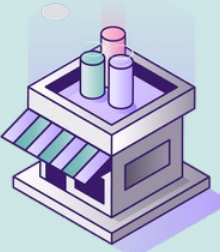

Longitudinal, geographically granular analysis of SME health, economic wellbeing and labour force trends to influence national policy.

Impact themes

Economic inactivity

Productivity & growth

Economic Wellbeing

Homelessness
