

Worksheet – Finding Data Task (10 mins)

Part 1: Finding data

Go to our Data Catalogue (<https://datacatalogue.ukdataservice.ac.uk/>). Use the search bar to type in keywords related to your topic of interest. If you don't have set topic, you can have a go searching for data that might help you answer questions on:

- a. How people feel about the police and justice system
- b. The impact of covid-19 on young people
- c. Exploring people's shopping habits
- d. Children's use of the internet

Part 2: Browsing data

After starting a search with your keywords, also try using the browsing facets on the left-hand side. For example, try to refine your search for just quantitative or just qualitative and mixed methods data. Then, narrow your search further to see datasets collected in the past 10 years. Explore all the facets and see how this changes your results.
