

# Managing and sharing research data for transparency and FAIRness

**Friday 24 January 2020**

**UK Data Archive, University of Essex**

In this hands-on workshop you will learn best practices for managing and publishing research data when your research involves human participants. Specific attention will be paid to (1) publishing and archiving evidence, data and documentation for transparency in research, in particular for qualitative research; and (2) making research data FAIR (Findable, Accessible, Interoperable and Reusable).

Practical demonstrations and hands-on exercises will be used throughout.

This workshop is suitable for researchers of all levels of expertise.

## Programme

09.30 Registration and coffee

10.00 Introduction to managing and sharing research data, the FAIR data principles and data management plans

10.30 Ethical and legal context for managing and sharing data from human participants: data protection and research ethics

11.00 Data, documentation and evidence for transparency for qualitative research: theory + exercises (coffee break at 11.30)

12.45 Lunch

13.30 Making data FAIR: documentation and metadata: theory + exercises

14.30 Making data FAIR: preparing and publishing data, incl. access, licensing and repository options: theory + demo

15.30 Close

## Trainers

Anca Vlad, Maureen Haaker and Veerle Van den Eynden, UK Data Service

## Fees

UK Students £30

UK academic staff, voluntary and public sector staff £60

Commercial and others £150
