What is the UK Data Service

- A comprehensive resource funded by the ESRC
- A single point of access to a wide range of secondary social science data
- Support, training and guidance

What data do we hold

UK surveys

Data about individuals or households

- Commissioned by Government departments
- Conducted by organisations such as the ONS, National Centre for Social Research

Datasets include key characteristics with large sample sizes

Nationally-representative

Repeated cross-sections

Same (or similar) questionnaire with a new sample of people every time, often repeated regularly

Survey weights

- Survey datasets contain weighting variable(s) in the dataset
- Make the sample data better represent the population – results can be incorrect without weights
- Easy to use in statistics packages
- Details will be in the survey documentation

For more information see out guides

- What is weighting?
- An introduction to using weights in social surveys (Video)
- How to use weights in Nesstar (Video)

Access conditions

Open access

- Available with few restrictions
- Small number of teaching datasets

Safeguarded

- Most survey data is safeguarded
- End User Licence (EUL)
- Need to register and agree to conditions
- May have additional conditions

Controlled

- Applications checked
- Access through a secure access agreement
- Access through a physical or virtual secure environment
