

Social data and the third sector: skills, tools and evidence

Workshop 1. Evidence and impact using census data

Patty Doran, UK Data Service, University of Manchester
Dave Rawnsley, UK Data Service, Jisc

Date: 2pm, Thursday July 2nd, 2020

What we are covering:

- Introduction
- Presentation – what are aggregate data?
- Quiz
- Demonstration – exploring with InFuse, GeoConvert, DKAN
- Activity – in own time, 10 mins
- Feedback from activity
- Questions and discussion

Introduction

What is the UK Data Service?

- A comprehensive resource funded by the Economic and Social Research Council (ESRC)
- A single point of access to a wide range of secondary social science data
- Support, training and guidance

Workshop objectives

- Promote UKDS data and resources to third sector users.
- Increase understanding of how data can be used within a variety of organisations and settings.
- Support you to access relevant data.
- Enable you to produce evidence by enhancing data knowledge and skills.

Social Surveys and the Third Sector

- Services: Improving outcomes for marginalised groups, reducing inequalities, providing a range of support to those most in need.
- Funding: relies on demonstrating the need and the potential impact of an intervention.
- UKDS: Social survey and census data can help provide context and demonstrate where services are most needed.
- Many third sector organisations are small, often there is no dedicated research team. Often it may fall to the people delivering the services to also provide the evidence of need and impact.

Our main data types

- **Aggregate Data**

- International macrodata – country level time series data
- Census tabular data

- **Microdata**

- UK surveys (e.g. Labour Force Survey)
- Census microdata
- International comparative surveys (e.g. European Social Survey)
- Business data

- **Other data**

- Mixed methods data
- Qualitative data

Aggregate data

What are aggregate data?

David Rawnsley
UKDS Senior Data Technical Officer

Evidence and impact using census data

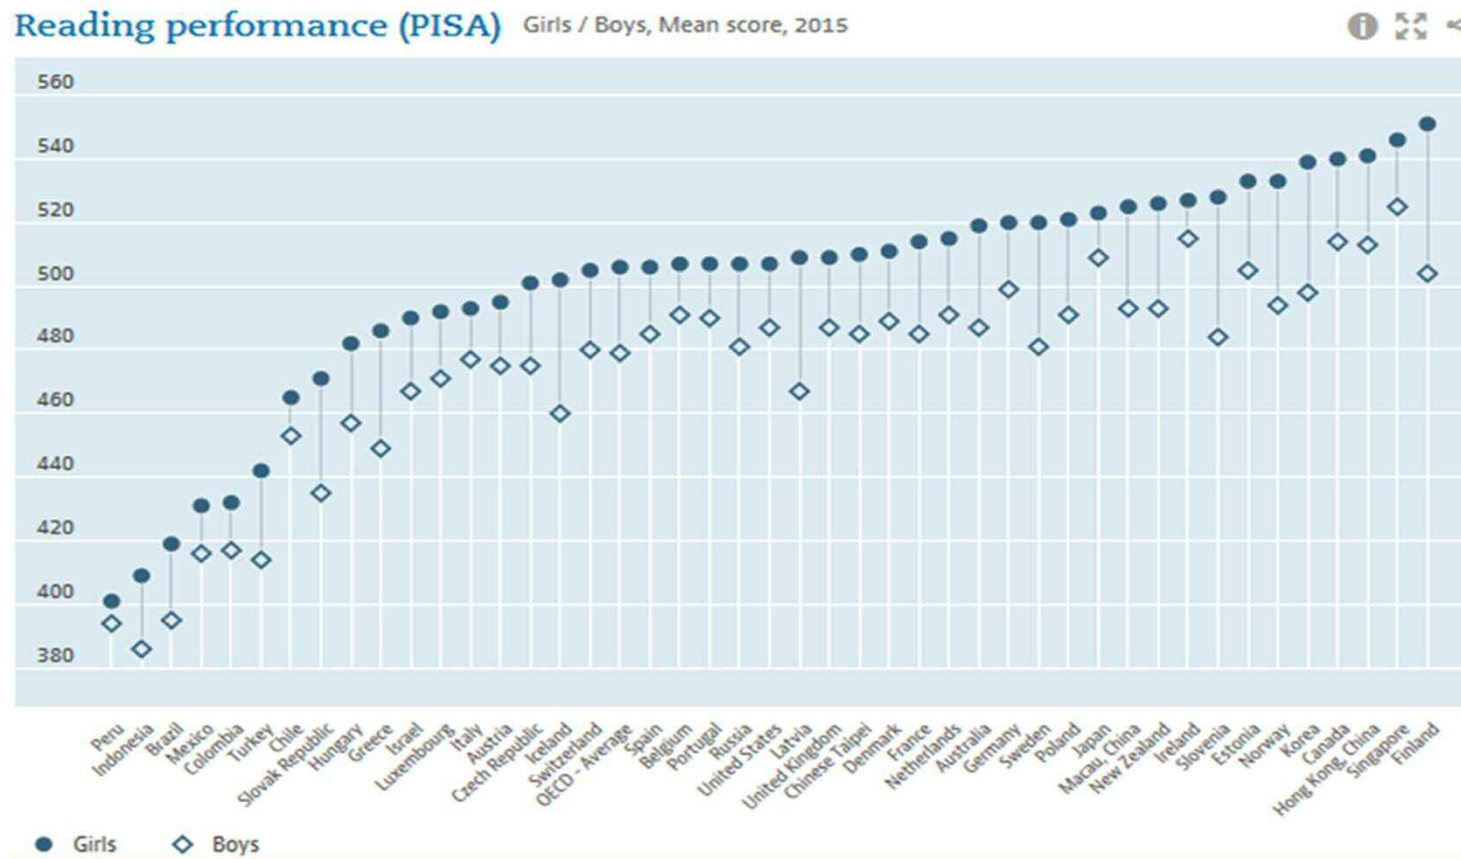

July 2nd 2020

Aggregate data are data about
populations, groups, regions or countries

Averaging individual level data

OECD Chart: Reading performance (PISA), Girls / Boys, Mean score, Annual, 2015

Totalling headcounts

Age: 16-24 years old – religion (England and Wales):
Muslim – Unit: people

Office for National Statistics ; National Records of Scotland ; Northern Ireland Statistics and Research Agency (2017): 2011 Census aggregate data. UK Data Service (Edition: February 2017). DOI: <http://dx.doi.org/10.5257/census/aggregate-2011-2>

What Can Census Data Tell Us

- The most complete source of information about demographic and socio-economic characteristics of the UK population.
 - Population
 - Employment, occupation, socio-economic class, qualifications
 - Ethnicity, religion, national identity, language
 - Housing, tenure, residence type
 - Household and family composition, occupancy
 - Carers and caring
 - Long term health problems or disability
 - Travel to work, migration

How are census aggregate data produced

18 What is your main language spoken at home? English, Other, write in (in English)

19 How well can you speak English? Very well, Well, Not well, Not at all

20 What is your religion? This question is voluntary. No religion, Christian (including Church of England), Protestant and other Christian, Buddhist, Hindu, Jewish, Muslim, Sikh, Any other religion, write in

Retirement age population (RAP) (Ages 65+)	5,784	13.9	55,456	13.3	55,456	13.3

The Tricky Issue of Census Geography

- Building block is the Output Area
- These are used to create Super Output Areas (SOA)
 - Two types – Lower layer SOA (LSOA) and Middle layer SOA (MSOA)
 - In Scotland – Data Zones (DZ) and Intermediate Geographies (IG)
 - In Northern Ireland – just LSOA
- None of the above relate to anything ‘real’.
- Regions, Counties, Local Authorities, Wards and Electoral Divisions
- <http://geoconvert.digitalresources.jisc.ac.uk/>

Aggregate data: shaping policy

<https://uk.wikibudgets.org/w/united-kingdom-budget-2015>

Activity

UKDS Online Workshops: Social data and the third sector: skills, tools and evidence

Workshop 1. Evidence and impact using census data

Worksheet

Task:

- 1) Find data to answer a question using InFuse.
- 2) Create and download a subset of data from InFuse

About InFuse

InFuse is a free service providing easy access to aggregate data from the UK 2011 and 2001 censuses. InFuse is designed to guide users in selecting census aggregate data relating to combinations of characteristics and areas of interest to them.

Website: <http://infuse.ukdataservice.ac.uk/>

Activity: Downloading data

You are interested in the impact of COVID-19 on older people living alone in Birmingham. In particular, you want to answer the following question:

What is the percentage of people aged 65 or over and living alone across all wards in Birmingham?

Instructions

1. Select 2011 Census Data
2. Select preferred route to your data
 - Choose *Geography*

1.

Access:

2011 Census data UK

2001 Census data England and Wales

Work through the handout

- Follow the handout instructions
- You can post questions in the chat box in Go To Webinar
- Work through the exercise in your own time
- Answer the questions at the end
- We will **come back together at 3pm** to discuss the activity and any other questions

Activity questions

1. Did you download the data?
2. How many variables (different pieces of information) did you download?
3. How many one-person households, where the householder is 65 or over, are there in Bartley Green?
4. What percentage of households in Bartley Green is this?
5. What is the percentage of people aged 65 or over and living alone across all wards in Birmingham?

Steps: 1 2 3 4

Download

[+ Show Guidance](#)

Selected Category Combinations

- 1808 - Household composition : Total: Household composition - Unit : Households
- 1810 - Household composition : One person household - Unit : Households
- 1812 - Household composition : Aged 65 and over - Unit : Households

Selected Areas

- All Wards and Electoral Divisions (40 areas) in Local Authorities (324 areas) - Birmingham

Contents

1. Introduction.....	4
1.1. What is R?	4
1.2. The pros and the cons of R	5
2. Using R: essential information	7
2.1. Installing and loading user-written packages.....	9
2.2. Getting help	10
2.3. Interacting with R: command line vs graphical interface.....	12
2.4. Objects in R	13
2.5. Deleting object from the R environment using the rm() function.....	14
2.6. Saving In R	14
3. R Studio	17
4. Opening UK Data Service datasets in R	19
4.1. Which version of UK Data Service datasets can I use in R?	19
4.2. Variables types.....	21
5. Essentials of data manipulation.....	23
5.1. Identifying and selecting variables and observations.....	23
5.2. Creating and recoding variables	24
5.3. Renaming variables and categories	25
5.4. Missing values	26
6. Descriptive statistics using R - continuous variables	29
6.1. Distribution graphs.....	30
6.2. Significance testing of correlation	33
6.3. Tables of summary statistics.....	33
6.4. Bar charts and plots of summary statistics.....	35
6.5. Saving and importing a graph in a Word document.....	38
6.6. Weighted descriptive statistics.....	39
7. Categorical variables: contingency tables	41

Surveys

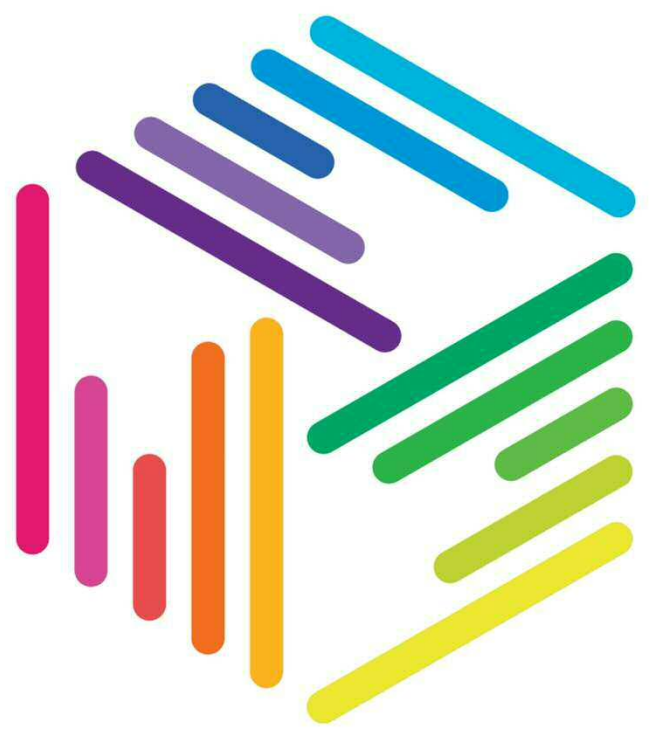

Unit 1: What are survey data?

This unit will explore survey data.

You will look at what the data are, some key concepts relating to survey data and how to find datasets that you can use.

You can work through this unit in order using the next button, or use the menu to view the list of sections and jump to the part you are most interested in.
