

# UK Data Service essentials: Introduction, finding and accessing data

Anna Woodfield  
Siôn Clarke

November 2025

# Overview of the first part of the session

- What is the UK Data Service?
- Who is it for?
- How can we help you
- What types of data do we hold?
- Questions?

# What is the UK Data Service?

- **The UK Data Service** is the principle repository for economic, population, and social research data in the UK
- We are the largest trusted digital archive of its kind, storing long-term access to high quality Social Science data since 1967
- Funded by the UKRI and ESRC.

# Cont...What is the UK Data Service?

- We provide researchers across academia, government, and policy organisations with high quality data and resources to generate impactful insights.
- Among these resources there is: research training, policy advising and the building of protocols that set the standard the data services sector.
- We have a [data impact blog](#) showcasing the impact of our research.

## Quick Facts:

Users access +190K datasets each year from our platform.

We have over 10,000 datasets in our collection.

# Who is it for?

- Academic researchers and students.
- Government analysts.
- Charities and foundations.
- Independent research centres and think tanks.
- Business consultants and data analysts.

\*A project is deemed commercial when the intended use of the data does not have a public benefit and revenue is being generated through its use.

# How could the UK Data Service help you?

- Wide range of datasets on a wide range of topics.
- Tools to access different datasets.
- Training and data specific events held throughout the year.
- Support throughout your whole project, from initial application to project end.
- SecureLab access environment.

# Sources of data

- National statistical authorities.
- UK government departments.
- Intergovernmental organisations.
- Research institutes.
- Individual researchers.

# Any questions so far?

# Overview of the second part of the session

- Types of data –breakdown of each, examples and tools.
- Finding data –exploring the catalogue.
- Registering to the UKDS.
- Accessing data – Different application types and tips.
- Which resources we hold?
- Questions?

# Survey Microdata

Survey Microdata			
Types of datasets	Type of data	Samples Available	Examples
Major UK Surveys  Cross-national Surveys  Longitudinal Studies	Anonymised individual or household level data.	Large sample sizes  Nationally representatives  Flexible	Crime Survey for England and Wales (1982-)   British Social Attitudes Survey (1983 -)

## Cross-sectional dataset

- Data for a single point in time.
- Many UK surveys are repeated cross-sectional, **large, nationally representative**
- The same information asked each time.
- Can be used to track trends over time.

## Longitudinal data: Panel and cohort data

- One key difference – it follows the **same individuals or households over time**.
- Change at individual level over time.
- Two main types – panel and cohort.

# Key datasets

Dataset	Type	Focus	Sample size
Crime Survey for England and Wales (1982 - present)	Cross-sectional	Levels of crime & public attitudes to crime.	33,000 people approx.
British Social Attitudes Survey (1983 - present)	Cross-sectional	Public views on a range of topics such as work, equalities, welfare, health, and how the country is run.	17,000 people approx.
Understanding Society (1991 - present)	Longitudinal – Panel	Wellbeing of subjects in health, work, education, income, family, and social life in the UK.	40,000 households approx.
National Child Development Study (1958 - present)	Longitudinal – Cohort	Physical and educational development, economic circumstances, employment, social/family life and attitudes.	17,000 approx.

# Cross-national surveys

- Allow comparisons across different countries through standardized comparative survey data.
- Large sample sizes.
- Flexible.
- International governmental organisation funded.

## Examples:

- Young Lives: an International Study of Childhood Poverty.
- Young Lives: School Survey.
- European Values Study.
- European Working Conditions Survey.

# International Macrodata

International Macrodata			
Types of datasets	Type of data	Samples Available	Examples
Aggregate or macro data such as World Bank, IMF	Time series data aggregated to country/region  Predominantly indicators of national performance and development	Large sample sizes  International governmental organisation funded	OECD Economic Outlook  IMF World Economic Outlook (WEO)

\*The topics include national accounts, industrial production, employment, trade, human development, etc.

# International Macrodata: Tools

- [International Aggregate Data from the UK Data Service](#)

*We recommend using Mozilla Firefox with this tool*

- Hosts hundreds of economic and social datasets provided by the World Bank, OECD, International Monetary Fund, United Nations, and International Energy Agency.
- View by data provider.
- Extract the information you require.
- User guides and video tutorials available - [Accessing, exploring and visualising international data](#).

# UK Census data

UK Census Data			
Types of datasets	Type of data	Samples Available	Examples
Census	Aggregate  Boundary  Flow  Microdata	Large sample sizes  Nationally representatives  Plenty demographic and socio-economic variables	UK Census Data

# Types of Census data:

- There are 4 kinds of census data available from the UKDS:

Type	Description	Available from
Aggregate	Provide counts, usually of individuals or households with particular characteristics for an area	2001 & 2011 (InFuse)
Boundary	Boundaries for each census in a range of Geographic Information System (GIS) formats.	from 1981 to 2021 (Boundary selector)
Flow	Records of the flows of people between places for each census	from 1981 to 2011 (WICID)
Microdata	Anonymised individual level records sampled from a single census	1961 to 2021 (individual datasets) 1851 to 1911 (I-CeM)

## InFuse

[UK Data Service](#) | [InFuse Home](#) | [Guide](#) | [Contact](#)

- [InFuse Home](#)
- [Guide](#)
- [Tutorial](#)
- [FAQs](#)
- [Citing data](#)
- [2011 geographies](#)
- [2011 topics](#)
- [Background](#)

**InFuse is a free service providing easy access to aggregate data from the UK 2011 and 2001 censuses**

### Access:

**2011 Census data** [UK](#)

**2001 Census data** [England and Wales](#)

### Data coverage

InFuse contains UK 2011 and 2001 English and Welsh Census aggregate data.

### About the data

UK censuses are surveys of the entire population of the UK carried out every ten years. Their primary purpose is to provide the UK government with high quality information about demographic and socio-economic characteristics on which to base policy and spending decisions. The information is also used for a wide variety of other purposes across all sectors of society.

Aggregate data from UK censuses are essentially counts of the numbers of the people and households recorded in the census surveys as possessing particular combinations of characteristics within geographical areas at a range of scales from the whole UK down to Output Areas.

### About InFuse

InFuse is designed to guide users in selecting census aggregate data relating to combinations of characteristics and areas of interest to them.

[How to download boundary data](#)

# Census flow data

- Flows of people between places – there is an origin and destination.
- Two main types: commuting and migration.
- Data available through the [WICID tool](#).

*We recommend using Mozilla Firefox with this tool*

# Census microdata

- Anonymised individual level records.
- Flexible.
- Samples of 1% – 5%.
- Lots of topics.

## Our impact

---

### [Gender Equality Index UK case study](#)

This new Impact Case Study looks at the Gender Equality Index UK: the first index to systematically measure and analyse the socioeconomic outcomes of women and men across all 372 local authorities in England, Scotland, Wales and Northern Ireland.

### [UK data infrastructure: challenges, opportunities — and a cornerstone](#)

Professor Alison Park, from the Economic and Social Research Council (ESRC), discusses the importance of UK social science data infrastructures and outlines some of the opportunities and challenges they face.

### [10,000 data collections: nearly six decades of data impact](#)

This year, the UK Data Service reached an incredible milestone — over 10,000 data collections are now discoverable through our Data Catalogue. But what is the journey to this milestone? What does it matter? And how does it set the stage for the next chapter of data innovation and impact?

## Access and Administration

### Data sourcing, processing and preparation:

Two csv files are included. One contains fathers' data and one contains mothers' data. Each data file contains responses to all the interview questions and the standardised measures administered. The measures administered were: Family Problem Solving Communication (McCubbin, McCubbin, & Thompson, 1996) General Health Questionnaire – 12 (Goldberg, 1978) Multidimensional Scale of Perceived Social Support (MSPSS) (Zimet, Dahlem, Zimet, & Farley, 1988) Subscales: Friend and Family Stigma (Link, Struening, Rahav, Phelan, & Nuttbrock, 1997) Subscale: Rejection Experiences Strengths and Difficulties Questionnaire (SDQ) and Impact Supplement (Goodman, 1997) Note that although the original sample consisted of 32 fathers, 36 mothers and 42 children from 41 families, not all consented to data sharing. Of the adults, 16 fathers and 27 mothers consented to data sharing. These are included. We did not ask consent for data sharing from interviewed children aged under 18 for vulnerability related reasons. Of the five interviewed children aged over 18, three consented to data sharing. We did not think this file was useful for data sharing due to the small sample size, so it is not included. However, note that information on 71 children was supplied by the parents and is contained within the parents' data files. Data is provided in .csv format, however researchers with access to SPSS who would like a version of the data containing variable and valuable labels are encouraged to get in touch.

# Safeguarded data: Commercial Access

The screenshot shows a web interface for the UK Data Service. A modal dialog titled "Complete actions for access" is open, displaying a list of steps on the left and detailed instructions for the "Depositor permission" step on the right. The background interface includes a navigation menu with "Find data" and "Depositor permission" highlighted, and a sidebar with "Data", "Projects", "Datasets by Project", "Browse Data Catalogue", "Deposits", and "My Details". The main content area shows a list of datasets with a "Payment required" warning and a "Complete actions" button.

**Complete actions for access**

- Introduction
- Accept standard EUL
- Additional condition of use
- Payment required
- Commercial licence
- Depositor permission**
- Depositor approval

**Depositor permission**

This dataset requires depositor permission. The Project Lead must download and complete the application form to request permission. All datasets requiring depositor permission for this project can be listed on the form.

The completed form must be sent via email to [our Access Services team](#), who will screen the form and then inform the Project Lead of the next steps in the process. Please ensure to include your Project Number in the subject line of the email.

# Safeguarded data: Commercial License

The screenshot shows a web interface for the UK Data Service. A modal dialog titled "Complete actions for access" is open, displaying a list of steps on the left and detailed instructions for the "Depositor permission" step on the right. The background interface includes a sidebar with navigation links like "Find data", "Deposits", and "My Details", and a main content area with a table of datasets and buttons for "Complete actions" and "Download selected".

**UK Data Service**

**Complete actions for access**

- Introduction
- Accept standard EUL
- Additional condition of use
- Payment required
- Commercial licence
- Depositor permission**
- Depositor approval

**Depositor permission**

This dataset requires depositor permission. The Project Lead must download and complete the application form to request permission. All datasets requiring depositor permission for this project can be listed on the form.

The completed form must be sent via email to [our Access Services team](#), who will screen the form and then inform the Project Lead of the next steps in the process. Please ensure to include your Project Number in the subject line of the email.

- Browse Data Catalogue
- Deposits
- My Details
- Select all datasets
- Actions
- Complete actions
- Download selected

# Special Licence example

The screenshot shows the UK Data Service website with a modal window titled "Complete actions for access". The modal has a sidebar on the left with a progress list: "Introduction" (pencil icon), "Accept standard EUL" (checkmark icon), "Complete Special Licence Bundle" (warning triangle icon, highlighted), and "Depositor approval" (clock icon). The main content area is titled "Complete Special Licence Bundle" and contains the following text:

To access data subject to the Special Licence Agreement a completed project application bundle must be submitted. The bundle consists of:

1. the Project Application Form which must be completed once by the project lead; and
2. the Special Licence User Agreement which must be completed and signed by each member of the project accessing the data.

Once the Application Form is completed in full and the Special Licence User Agreements have been signed by all project members, the project lead must return by email to [help@ukdataservice.ac.uk](mailto:help@ukdataservice.ac.uk) the bundle of documents mentioning the Project Number in the subject of the email.

If you wish to add additional Special Licence data to a project that has already been approved, please contact our helpdesk at [help@ukdataservice.ac.uk](mailto:help@ukdataservice.ac.uk) or at 01206 872143 at your earliest convenience.

Below the text is a document icon and a link: [Special Licence Application Bundle](#).

At the bottom of the modal, it says "Your changes will be saved automatically." and there are three buttons: "Close", "Back", and "Next".

# Secure Access Datasets

## Access study data

The Data Collection is available to users registered with the UK Data Service.

Commercial use is not permitted.

Use of the data requires approval from the data owner or their nominee. Registered users must apply for access via a Secure Access application.

Registered users must complete the Safe Researcher Training course.

Registered users must be based in the UK or be able to access the data via a Safe Room part of the International Data Access Network. For further information please visit the [International Data Access Network webpage](#).

The Data Collection must be accessed via a secure connection method in a safe environment approved by the UK Data Service.

Add these data to your account. (Only available via Secure Lab remote access)

### Citation and copyright

### Abstract

### Main topics

# Controlled/Secure data

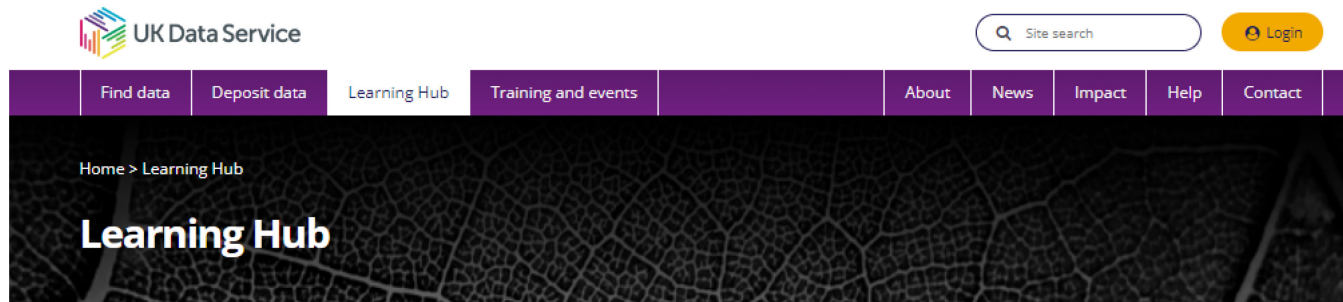

- Data classified as personal information or personal data and data that are particularly sensitive, commercially or otherwise.
- Use of data is subject to the End User Licence Agreement (PDF) and facilitated via the Five Safes framework.
- These data are made available to registered, authenticated, trained and accredited researchers, with projects approved by the data owner(s) through a secure connection method.
- Before access is given to the UK Data Service SecureLab, each team member and a suitable delegated authority in their institution must sign our Secure Access User Agreement (PDF).

# Secure Access Datasets

The Five Safes	
Is this an appropriate use of the data?	Safe projects +
How trustworthy are the researchers?	Safe people +
Does the environment prevent misuse?	Safe setting +
Is the data detail appropriate?	Safe data +
Is there any confidentiality risk from publication?	Safe outputs =
	Safe use

# Resources for using data

## Enhance your data skills and teaching

### New to using data

Best practice and training for researchers new to accessing and using data in our collection. Includes advice and tools to correctly cite data; student-specific information on our Dissertation Award for undergraduates; and more.

### Data skills modules

There is a wealth of data available for reuse in research and reports. These free, interactive tutorials are designed for anyone who wants to start using secondary data. They show you how to get started with finding good quality data, understanding it and starting your analyses.

### Students

Students can access most of the UK Data Service's collection of social, economic and population data. Find resources to help you find and use our data during your studies including the UK Data Service dissertation resources.

### Survey data

Survey data, including data from long-running surveys, series and longitudinal studies, are a major part of social science research. Learn how to use survey and longitudinal data through training resources including videos, on-demand webinars and written guides.

### International data

Our international macrodata contain socio-economic time series data aggregated to a country or regional level for a range of countries over a substantial time period.

### Qualitative data

Qualitative research gives a voice to the lived experience, offering researchers a deeper insight into a topic or individuals' experiences. Qualitative data can be combined with quantitative to enhance understanding around a policy or topic in a way that quantitative data by itself often cannot.
