

Data publishing

Evaluate how data repositories disseminate and publish their data collections. Use the repository portal or search/browse area to find data on a topic of interest.

- UK Data Service: <http://discover.ukdataservice.ac.uk/>
- Dataverse: <http://dvn.iq.harvard.edu/dvn/>
- DANS: <http://www.dans.knaw.nl/en>
- Journal of Open Psychology Data <http://openpsychologydata.metajnl.com>
- Edinburgh DataShare: <http://datashare.is.ed.ac.uk/>
- Zenodo: <https://zenodo.org/>

Discuss:

- How easy and intuitive is the system?
- How easy was it to find data?
- How was the metadata for the data collection exposed and used? Did the metadata give enough information to understand the data content?
- Can anyone download the data or are there conditions attached?
- What is the repository's data use agreement?
- Are there restricted/confidential data in the repository?
